INDEX OF ABSTRACTS

Volume 7 (1978)

ABDEL-HAMEED, Mohamed. Optimal stopping of a discounted generalized random walk, 78t-161.

ADLER, Robert J. A note on some differences between two multi-parameter Brownian motions, 78t-76.

AHMAD, Ibrahim A. Further results on rates of convergence in the random CLT for partial sums and maximum partial sums, 78t-77; Conditioned rates of convergence of sums, maximum sums, and first passage variables with applications, 165-11.

AHMAD, Ibrahim A. and BASU, A. K. Rates of convergence of the extended first passage time, 163-2.

AHMAD, Manzoor. Tests for mean and discriminant vectors, 78t-11.

AHMAD, Munir. On a generalization of bivariate Poisson distribution, 165-137.

AHMAD, R. and AL-MUTAIR, M. A. Nonparametric sequential contrast method approach to the multivariate K-sample problem, 78t-47.

AHSANULLAH, M. Record values and the exponential distribution, 78t-50.

AKRITAS, M. G., ROUSSAS, George and PURI, M. L. Sample size, parameter rates and contiguity - the i.i.d. case, 78t-106.

ALDOUS, D. J. Weak convergence of stochastic processes, for processes viewed in the Strasbourg manner (preliminary report), 78t-140.

ALLEN, O. Brian. Maximum likelihood estimation for a class of non-linear birth-and-death processes (preliminary report), 161-9.

AL-MUTAIR, M. A. and AHMAD, R. Nonparametric sequential contrast method approach to the multivariate K-sample problem, 78t-47.

ALVO, Mayer. Sequential allocation, 165-130.

AMMAN, Larry P. and THALL, Peter F. Multivariate infinitely divisible random measures (preliminary report), 165-59; Count distributions, orderliness and invariance of Poisson cluster processes, 78t-154.

ANBAR, Dan. Estimating the mean of a normal distribution with partially known coefficient of variation, 164-5.

ANSCOMBE, F. J. Harmonic regression, 162-1.

ANTONIAK, C. Estimating the parameter of a Dirichlet process, with applications to empirical Bayes analysis, 165-68.

AWAD, Adnan M. Martingale approach to asymptotic normality of posterior distributions, 78t-173.

BABU, G. J. and SINGH, Kesar. On deviations between empirical and quantile processes for mixing random variables, 78t-100.

BADDELEY, Adrian. On combinatorial probabilities for hyperplanes (preliminary report), 78t-120.

BANERJEE, P. K. and GIRI, N. On D-, E-, D_A and D_M optimality properties of test procedures of hypotheses concerning the covariance matrix of a normal distribution, 78t-41.

BASU, A. K. On the rate of approximation in the central limit theorem for dependent random variables and vectors, 165-7.

BASU, A. K. and AHMAD, I. A. Rates of convergence of the extended first passage time, 163-2.

BASU, A. K. On rates of convergence to infinitely divisible laws for dependent random variables and random vectors, 78t-180.

BASU, Asit P. The estimation of $P(X<Y)$ for distributions useful in life testing, 165-84.

BASU, Asit P. and GHOSH, J. K. Identifiability of the multinormal distribution under competing risk model, 161-1; Asymptotic properties of mle for the independent not identically distributed case with life testing applications, 78t-58; Locally most powerful unbiased rank tests for the two-sample problem with incomplete data (preliminary report), 78t-163.

BASU, Sujit K. and BHATTACHARJEE, Manish C. Maximum time to reach an absorbing state of a Markov chain with go/no-go control options, 78t-9.

BASU, Sujit K. and MAEJIMA, Makota. An improved local limit theorem concerning variables in the domain of normal attraction of a stable law of index α, $1<\alpha<2$, 78t-164.

BEG, M. I. and KIRMANI, S. N. U. A. A characterization of the negative exponential distribution, 165-34.
